Geothermal Rate Schedule

Revised December, 2015

General Service

All service accounts will be charged a \$4.00 per month administration fee.

SUPPLY WATER RATES: \$0.3485 per 100 gallons

COLLECTION WATER RATES: \$0.1394 per 100 gallons

COLLECTION WATER RATES (measured by therms): \$0.8563 per therm

Connection Incentive for Properties Adjacent to the Distribution System

For properties that can be served without the need for extension of a main line (i.e. only construction of a service line is needed), the first twelve (12) months of service after connection will be at no cost for up to 150% of the estimated volume to be used as determined by the City of Boise Public Works Department.

For properties currently connected, that add equipment to increase the utilization of service, the first twelve (12) months of incremental increase in service will be at no cost for up to 150% of the estimated increase of volume as determined by the City of Boise Public Works Department.

Central Addition – LIV District

All service accounts will be charged a \$4.00 per month administration fee.

SUPPLY WATER RATES: \$0.3485 per 100 gallons

COLLECTION WATER RATES: \$0.1255 per 100 gallons

COLLECTION WATER RATES (measured by therms): \$0.7707 per therm

Collection Water Incentive

Connecting a building to the collection water may result in a small increase in the initial capital investment compared to connecting onto the supply water. A credit will be provided for the higher capital cost in the form of geothermal collection water in the amount equal to 125% of the cost difference, as documented by an engineer's estimate.

The General Service incentive of supplying properties adjacent to existing geothermal pipelines is also available. The property owner/developer shall choose one incentive; the ability to receive both incentives is not an option.
