

# LANDER STREET

## WATER RENEWAL FACILITY IMPROVEMENTS

### Community Workshop #2

# Welcome

## Lander Street Water Renewal Facility Community Workshop #2

# Why we're here today

- The City of Boise is improving the Lander Street facility and wants community involvement
- Improvements are necessary:
  - Permit Requirements – Improves Boise River
  - Growth – Expands economic base of the city
  - Rehabilitation – Makes utility more efficient

# Boise's water renewal facilities plan

- Boise's water renewal system
  - Lander Street, West Boise, Dixie Drain, 20 Mile South Farm
- What is water renewal/larger vision for the system?
- Boise's approach to water renewal
  - Sustainability
  - Innovation
  - Commitment to environment

# The process

- Conditional Use Permit
- Public involvement
- Early construction activities
- Phased approach to construction over 10 years
- Final build-out over 15 to 20 years.

# Community workshops

- This is the second of three planned workshops
- First workshop in June:
  - Provided an overview of the Lander Street facility and the range of possible improvements
  - Asked participants to identify issues and concerns to be considered in the improvement process

# Today's workshop

- Break out into groups
  - Provide more details about the phased improvements and the outcomes of workshop #1
  - Present a range of alternatives for your input

## NOTE:

All the alternatives meet the needs of the project and address community issues raised in workshop #1

# Next steps

- Take input we receive and working with technical experts, develop a preferred alternative
- Present alternative during Workshop #3 for community review and comment
- Construction information will be discussed at Workshop #3

# Input and comments are always welcome
